

TOBIAS-THOMPSON COMPLEX

4 miles southeast of Geneseo

This archeological district contains a cluster of eight related village sites located on the crests of ridges on both sides of the Little Arkansas River. Dating from A.D. 1500 to 1700, these villages are a link between prehistoric and historic periods, connecting the Little River Focus of the Great Bend Aspect and the Wichita Tribe. The villages may have been among those that Coronado visited in 1542.
